PROFESSIONAL SUMMARY

Final-year B.E. Computer Science and Design student (graduating 2027) with hands-on experience in Java full-stack development, including REST APIs, backend services, and web applications built with Java, Spring Boot, React, and MySQL. Completed a 3-month Full Stack Developer internship at ORVIONAR, contributing to frontend, backend, and database components in a professional development environment. Strong foundation in Object-Oriented Programming and Data Structures, with practical experience across the full development lifecycle from UI implementation to REST API design and database integration. Seeking to contribute as a Software Engineer / Java Full Stack Developer in a growth-focused organization.

TECHNICAL SKILLS

Programming Languages: Java, SQL, JavaScript

Core Concepts: OOP, Data Structures, Collections Framework, Exception Handling

Backend: Spring Boot, REST APIs, JDBC, Maven, Node.js, Express.js

Frontend: React, HTML, CSS, JavaScript

Databases: MySQL

Tools & Practices: Git, GitHub, Postman, Debugging, Agile Development Basics

PROFESSIONAL EXPERIENCE

Full Stack Developer Intern — ORVIONAR Tech Private Limited

June 2026 – August 2026

- Built frontend pages and UI components using React, HTML, CSS, and JavaScript, and connected them with backend REST APIs.
- Created backend REST APIs using Java, Spring Boot, and Node.js/Express.js.
- Implemented login and authentication functionality, and worked with MySQL databases, writing and optimizing SQL queries.
- Collaborated with the development team using Git and GitHub throughout the internship.

PROJECTS

Smart Timetable Scheduling System

Java, Spring Boot, React, TypeScript, PostgreSQL, Timefold, REST API, JWT, Maven

- Engineered a full-stack timetable scheduling platform to automate college timetable generation and academic resource management.
- Established constraint-based scheduling for faculty availability, classroom capacity, workload limits, section conflicts, and consecutive lab periods.
- Integrated Timefold Solver to optimize timetables by reducing scheduling conflicts, unassigned classes, and faculty idle periods.
- Built secure REST APIs with JWT authentication, role-based access, JPA/Hibernate persistence, and timetable reporting.

Static Website Hosting Platform

Java, Spring Boot, React, MySQL, REST API, Maven, Git

- Designed a self-service web platform enabling users to upload, deploy, and manage static websites through a simple, guided interface.
- Implemented secure user authentication and session management in Java and Spring Boot to protect user accounts and deployed project data.
- Integrated REST APIs in Spring Boot, validated with Postman, to support file upload, project management, and deployment workflows.
- Structured project build and dependency management using Maven and Git version control, ensuring a repeatable and reliable deployment process.

EDUCATION

Bachelor of Engineering (B.E.) – Computer Science and Design

Expected 2027

Erode Sengunthar Engineering College | CGPA: 7.5 / 10

Higher Secondary Education (State Board)

2023

SPB Matric Higher Secondary School | Percentage: 70%

CERTIFICATIONS

- Java Programming – Infosys Springboard (2024):** Completed comprehensive coursework in OOP, control statements, arrays, methods, and exception handling.
- HTML & CSS Fundamentals – Infosys Springboard (2025):** Completed training in responsive web design, page layout, and user-friendly interface styling.
- SQL Case Study – SQL Workshop – Infosys Springboard (2026):** Successfully completed a SQL-focused workshop covering practical SQL concepts and case-study-based problem solving.
