PROFESSIONAL SUMMARY

Final-year Computer Science and Design student specializing in Java full-stack development, with hands-on experience building REST APIs and web applications using Spring Boot, React, and MySQL. Completed an industry internship delivering frontend, backend, and database solutions in a professional development environment. Combines strong object-oriented programming fundamentals with a fast learning curve and a genuine passion for backend engineering and scalable software design. Eager to contribute as a Software Engineer / Java Full Stack Developer in a growth-focused product or service organization.

TECHNICAL SKILLS

- **Languages & Core:** Java, SQL, OOP, Data Structures, Collections Framework, Exception Handling
- **Backend & APIs:** Spring Boot, REST APIs, JDBC, Maven
- **Frontend:** React, HTML, CSS, JavaScript
- **Database:** MySQL
- **Tools & Practices:** Git, GitHub, Problem Solving, Debugging, Agile Development Basics

EDUCATION

Bachelor of Engineering (B.E.) – Computer Science and Design

Erode Sengunthar Engineering College | Expected Graduation: 2027 | CGPA: 7.5 / 10

Higher Secondary Education (State Board)

SPB Matric Higher Secondary School | 2023 | Percentage: 70%

PROJECTS

Food Delivery Application | Java, Spring Boot, React, MySQL, REST API

- Designed and developed a full-stack food ordering platform to let users browse menus, place orders, and track order status in real time, replacing a static, non-interactive ordering flow.
- Built RESTful APIs in Spring Boot to handle menu management, order placement, and order-status updates, integrated with a MySQL relational database for persistent storage.
- Implemented a responsive React frontend with intuitive navigation, improving usability of menu browsing and checkout for end users.
- Engineered real-time order-tracking functionality, giving customers live visibility into order progress from placement to delivery.

Static Website Hosting Platform | Java, Spring Boot, React, MySQL, REST API, Maven

- Developed a self-service web platform enabling users to upload, deploy, and manage static websites through a simple, guided interface.
- Implemented secure user authentication and session management to protect user accounts and deployed project data.
- Designed and integrated REST APIs in Spring Boot to support file upload, project management, and website deployment workflows.

- Structured the project build and dependency management using Maven, ensuring a repeatable and reliable deployment process.

CERTIFICATIONS

- **Java Programming – Infosys Springboard (2024):** Completed comprehensive coursework in OOP, control statements, arrays, methods, and exception handling.
- **HTML & CSS Fundamentals – Infosys Springboard (2025):** Completed training in responsive web design, page layout, and user-friendly interface styling.
